Welcome to Catfish-Pro

The dedicated supplier of a full range of catfishing tackle and accessories for fishing in the UK and abroad.

Catfish-Pro has been set up by Simon Clarke to meet the growing interest in catfishing. There are now over 300 fisheries in the UK containing catfish and they are a species that can be hard to catch and Catfish-Pro is here to help.

All Catfish-Pro products are designed and produced with catfish first, so you don't have to make do with tackle that isn't quite right or "will do". The Catfish-Pro range is growing and new products are regularly being introduced so keep in touch for the latest news and information. Good luck and good catting!

Catfish Hooklink Materials

Catfish-Pro has a variety of the best quality hooklinks available to suit the methods you are using and the size of catfish you are targeting, whether in the UK or abroad

Catlink

The hooklink is one of the most important items of catfishing tackle! More catfish are lost due to inadequate hooklink than anything else. With Catfish-Pro Catlink you can be confident of landing your catfish.

Catlink is a pure aramid(Kevlar) braided line. It is soft and very supple with fantastic abrasion resistance. It also sinks making an ideal hooklink for catfish.

It also makes a great hooklink for carp fishing where high abrasion resistance is required and has also been used successfully for Perch, Eels and Zander. Because it has only limited cut resistance it is not recommended for pike fishing.

Catlink is supplied in natural(cream colour) or black colour, except 68kg and 100kg which is natural only.

Breaking Strains - available in 20m & 50m

Catfish-Pro Pikesafe

New, from Catfish-Pro, a brilliant very soft and supple PVC coated wire.

Pikesafe is ideal for catfish hooklinks if you are fishing a water with very high pike population or at a venue where fishery rules dictate use of wire with livebaits. Very easy to make traces simply twist the wire and heat with a lighter to seal or you can even knot it. An ideal hooklink for Pike and Zander fishing where you want a soft wire.

Pikesafe is rated at 25lb breaking strain and is available in 15m spools

Catfish-Pro Toughlink

Look out for Toughlink out soon!

New low memory hooklink ideal for stiff hooklink rigs such as the Catocopter and for polyballs rigs.

Toughlink is supplied in 20lb breaking strain in 20m spools

Catfish Hooks

Along with the hooklink the other most critical element of any catfish rig is the hook. Catfish are hard to catch so make sure you land that fish with top quality Japanese hooks from Catfish-Pro.

Maruto Eagle Wave Hooks

Known amongst catfish anglers as "the catfish hook" this is the best catfish pattern available and is the top selling catfish hook across Europe including the current world record.

Eagle Waves have a distinctive squared design with long point and wide gape and have offset points. This means they are ideal for the bulky baits most often used for catfish, and the offset points position the hook to optimize hook up rates. The smaller sizes have also been adopted by Carp and Barbel anglers with great success.

The hook is available in

- Standard Gauge
- Barbless in UK sizes
- Heavy Duty for the biggest catfish

Guidance on hooks sizes to use:

UK – use size 4 to 2/0 – the larger the bait the bigger the hook

France – use 1/0 to 4/0 – again depending on baits size

Spain & other big rivers – 4/0 to 10/0 depending on bait size and rig used

(rig may also need treble hooks) Standard Gauge

Extra Strong Trebles

When using large livebaits abroad and for large lures, treble hooks are usually used. The Catfish-Pro extra strong trebles are extremely tough and will stand up to the biggest cats.

BP Special Hooks

With the increased use of boilies and pellets, particularly in France and Spain you do not always need an Eagle Wave hook for these smaller baits. Catfish-Pro has the BP Special (Boilie/Pellet), a hook which has been in use by many guiding companies on the River Ebro and has accounted for many large cats to over 200lbs. Very short shank, wide gape with a heavy gauge wire they offer a great balance for a Boilie or Pellet bait.

Recommended sizes 1/0 or 2/0 for UK, 2/0-4/0 for France, 5/0-10/0 for Spain.

Ceramic Run Rings

These ultra hard, low resistance run rings are ideal for links, markers and winching rigs. The ceramic finish gives them very low resistance and their hardness prevents damage from braided lines that often wear through cheaper rings

| | | |
|----------------------|------|---|
| Ceramic Run Rings L | 10mm | 3 |
| Ceramic Run Rings XL | 12mm | 3 |

Bait Shields

Designed by Catfish-Pro, these thick rubber discs are ideal for putting on your hook after the bait to keep them on the hook. Particularly useful if using barbless hooks in conjunction with livebaits. Bait shields are also ideal to act as stops if you are using baits on a hair such as pre-drilled halibut pellets or soft baits such as liver or squid, when normal boilie stops are too small.

| | |
|-----------------------|------------|
| Livebait Shields UK | Pack of 25 |
| Livebait Shields Euro | Pack of 25 |

Rig Rattles

Ideal for enhancing your livebaits rigs; clip on rattles, supplied with ball bearing. Fold over laying the line in the hinge groove, snap shut with ball bearing inside. Recommended to be used approx 2in from bait on the hooklink. You may need to use rubber float stops either size to prevent sliding with lighter lines. Proved effective for catfish, pike, perch and for sea fish.
